

On Tuesday, March 8, the Wilderness Committee met regarding masking protocols. Currently, St. Croix County, Pierce County and Washington County have a LOW community risk level for Covid-19.

The committee decided after reading the updated CDC guidelines for masking to change our protocols to masks being optional in the church.

The committee will check the CDC website weekly and if the counties of St. Croix, Pierce and Washington continue in the low-risk category, protocols will stay the same. If the county numbers are in the medium/high range, we will require masks to be worn.

This change will be in effect at tonight's Wednesday Lenten service.
